Disaster Recovery Services
Planning & Implementation Solutions

How long would it take your business to recover after a disaster? Could your business sustain such an outage? According to the National Archives, 93% of companies without a disaster recovery plan who suffer a major data disaster are out of business within **one** year.

The best offense is a good defense! The strength to avert disasters and effectively handle ones that occur begins with knowledge. Understanding your vulnerabilities, safeguarding against the risks, and preparing for the worst possible business disruption is vital to protecting your business. WVC Technologies' Disaster Recovery (DR) planning and implementation services gives you the confidence that your information is protected and productivity will not be disrupted.

5 Question Assessment

1. Does your business have an IT disaster recovery plan?
2. Do you know which systems are mission critical to your business?
3. Would you be able to run your business without your most critical server?
4. Do you have a reliable, off-site backup solution?
5. Could your business sustain an outage?

If you answered "no" to any of these questions, your organization is in danger of losing everything! Take action today and connect with us.

Disaster Recovery Service Benefits

✔ **Rapid recovery**

✔ **Reputation protection**

✔ **Expert guidance**

✔ **Revenue safeguard**

✔ **Guaranteed testing**

✔ **Peace of mind**

Create

We offer IT disaster recovery, high availability, and backup solutions to keep you and your business protected. Our specialists will guide you through the process of analyzing your backup requirements and outlining solutions that are best suited for your business.

Practice

Testing is crucial to ensure all systems work as intended. Our highly trained and skilled resiliency consultants assist you through initial testing by helping you create and validate tests. Our testing helps identify any IT recovery plan issues and gaps to be addressed.

Implement

In the event of a system outage, your disaster recovery plan provides you with a reliable, agile solution you need to minimize your risk and get back in business. We can compliment this offering with remote backup service.
